

JEMELITO CONSTANTINO

AI/ML Engineer | Full-Stack Software Engineer

+63 931 207 1477 | jemelitoconstantino@gmail.com | linkedin.com/in/jemelito-constantino-a525b9187

SUMMARY

Senior software engineer with 7+ years architecting and shipping production systems and full-stack web platforms. Deep hands-on experience with distributed services, API design, and cloud-native architectures on GCP. Strong ownership across the stack, including system design, API architecture, deployment, observability, and code quality, with a track record of taking products from prototype to production for international clients and early-stage ventures.

TECHNICAL EXPERTISE

Languages: Python, TypeScript, JavaScript, C#, SQL

AI / ML: LLM Integration (OpenAI, Anthropic), LangChain, Agent Systems, RAG, Prompt Engineering, TensorFlow, PyTorch, OpenCV, YOLO, Hugging Face, Scikit-learn

Backend: FastAPI, NestJS, Node.js, Express, .NET, Django, Flask, REST, GraphQL, WebSockets, Microservices

Frontend: Next.js, React, TypeScript, Nuxt, Vue, Angular, Tailwind CSS

Data: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Linux

Engineering Practices: System Design, API Design, Code Review, Testing (TDD), Observability, Agile/Scrum, Technical Documentation

PROFESSIONAL EXPERIENCE

AI/ML Engineer

Surigao Education Center | 2025 - Present | Part-time, Hybrid - Caraga, Philippines

- Architect and ship production AI/ML systems end-to-end, supporting educational programs and operational workflows.
- Design and integrate LLM-powered agents, automation pipelines, and intelligent assistants on OpenAI and LangChain stacks.
- Own model selection, prompt design, evaluation strategy, and production hardening for AI features.
- Drive AI adoption across cross-functional teams; establish engineering standards for prompt evaluation, agent tracing, and AI observability.

Software Engineer

goLance | 2019 - Present | Remote

- Architect and deliver full-stack and AI features end-to-end for international clients across SaaS, marketplace, and AI product domains.
- Design scalable backend services and APIs in Python (FastAPI), Node.js (NestJS/Express), and .NET, backed by PostgreSQL, MongoDB, and Redis.
- Build modern frontend systems in React, Next.js, and TypeScript with strong performance, accessibility, and UX discipline.
- Integrate LLMs, computer vision, and automation into production product workflows; own deployment on AWS and GCP via Docker, Kubernetes, and CI/CD pipelines.
- Partner with founders and product teams on architecture decisions, technical planning, code review, and delivery roadmaps.

Full Stack Developer

Upwork, Fiverr, PPH | June 2021 - December 2023 | Freelance

- Delivered 30+ end-to-end engagements spanning full-stack web platforms, AI and LLM integration, and workflow automation.
- Owned architecture, implementation, and delivery on greenfield builds and legacy modernization across Next.js, React, FastAPI, Django, and PostgreSQL.
- Built and shipped production systems with 100% client retention and repeat-engagement rate.
- Translated ambiguous client requirements into clean, well-tested, maintainable codebases.

Software Engineering Intern

SafeTravelPH | June 2018 - August 2019 | On-site, Philippines

- Built backend services and frontend features for a travel safety platform within an Agile delivery cycle.
- Implemented REST APIs, relational schema design, and UI components under senior engineer mentorship.
- Contributed to code reviews, testing, and release processes.

ADVISORY & ENTREPRENEURSHIP

Web3 Business Development Consultant — *Victus Global | October 2025 - Present*

- Lead business development, partnerships, and go-to-market strategy in the Web3 and blockchain field. Identify and negotiate strategic deals for early-stage ventures.

Listing Manager — *PointPay | 2024 - Present*

- Manage token listing operations for the cryptocurrency exchange. Evaluate listing applicants, conduct project due diligence, negotiate commercial terms with project teams, and coordinate rollout with compliance, legal, and engineering teams.

Medical Coder — *Caraga Regional Hospital | 2024 - Present*

- Review patient records and assign ICD-10 and CPT diagnostic and procedural codes for billing and records management. Ensure coding accuracy and compliance with healthcare and reimbursement standards.

EDUCATION

Master of Science (in progress)

Mapua University | 2025 - Present

Development Academy of the Philippines (DAP)

Data Associate and Data Analytics | 2020 - Present

Bachelor of Science in Computer Science

Cebu Institute of Technology | 2010 - 2014
